#### **DETAILED ACTION**

### **Priority**

1. Acknowledgment is made of applicant's claim for priority under 35 U.S.C. 119(a)-(d) based upon an PCT application filed Israel on 15 June 2000. A claim for priority under 35 U.S.C. 119(a)-(d) cannot be based on said application, since the United States application was filed more than twelve months thereafter.

## Claim Objections

2. Claims 1, 11 and 12 are objected to because of the following informalities: In claim 1, "the focal plane" should be ---a focal plane---; and in claims 11 and 12, "the digestive tract" in lines 2-3 and "the output" in line 3 should respectively be ---a digestive tract--- and ---an output---.

Appropriate correction is required.

## Claim Rejections - 35 USC § 112

- 3. The following is a quotation of the first paragraph of 35 U.S.C. 112:
  - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 4. Claims 1-12 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification does not

Art Unit: 2873

disclose a reflecting means having a plurality of reflecting surfaces. The specification also does not disclose more than one receiving means.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

- 6. Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 7. Claim 1 recites the limitation "the focal curve plane" in line 8. There is insufficient antecedent basis for this limitation in the claim.
- 8. In claims 3, the phrase "receiving means are positioned in proximity of the focal curve plane, such that, when illuminating, rays from the illumination element, that are internally reflected from the optical window surfaces, will not be incident on the receiving means" renders the claim indefinite because it is unclear as to the positional relationship of the receiving means with respect to the focal curve.

## Allowable Subject Matter

9. Due to the indefiniteness of the claimed invention as rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement, allowable subject matter could not be determined.
